Rooted in the Verapaces

FEDECOVERA - Federation of Cooperatives of the Verapaces - was founded in Cobán in 1976, when local cooperatives joined forces to process and sell their harvests together. What began as a path to fairer markets has grown into a federation that brings the harvests of northern Guatemala to the world.

Our members are mostly Q'eqchi' and Poqomchi' Mayan families who farm plots in the mountains and cloud forests of Alta and Baja Verapaz.

Together, we work as a single chain: our members grow, their cooperatives collect, and FEDECOVERA processes, certifies and exports. This is how we deliver consistent quality while keeping the value in the hands of those who produce it.

WE ARE DEDICATED TO BUILD A BETTER FUTURE DAY BY DAY, WITH SHARED BENEFITS THROUGHOUT OUR VALUE CHAINS BY:

- Ensuring a sustainable supply chain of high quality products that directly benefits both small-scale farmers and consumers.
- Empowering small-scale farmers to develop strong and prosperous producing communities.
- Promoting environmental sustainable production practices that maintain and increase biodiversity and crop diversification.

FEDECOVERA at a glance

50 years as a cooperative federation

35,000 producer families

42 cooperatives
120+ producer associations

+20 years exporting to 5 continents

Global business experience.

9 international certifications

Independently verified food safety, organic and regenerative farming, fairtrade and ethical sourcing from the farm to your door.

8 value chains

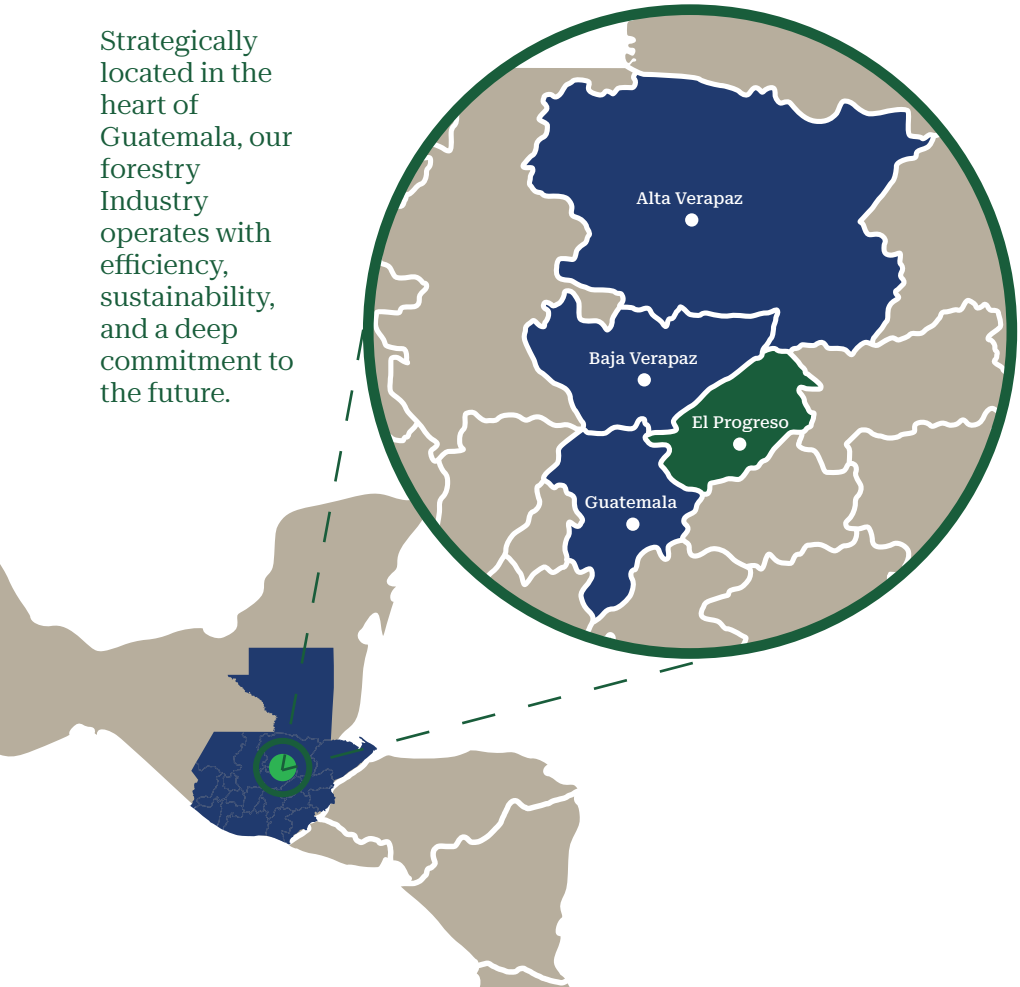

Cardamom, allspice, coffee, cocoa beans, turmeric, black tea, essential oils and sustainable forestry development.

3 processing plants

2 in Cobán, Alta Verapaz, and 1 in El Rancho, El Progreso

Strategically located in the heart of Guatemala, our forestry Industry operates with efficiency, sustainability, and a deep commitment to the future.

FedecoVera

The Real Social, Economic, Inclusive and Environmental Business Model

Small-Scale Producers
Voluntary and Independent

The main actors and the reason for the existence of our organization. **Small producers make up the cooperatives.**

Cooperatives
1st Level Organization

First-level organizational model where producers are organized. **Cooperatives make up FEDECOVERA.**

FEDECOVERA
2nd Level Organization

Second-level organizational model; it is the bridge between producers and the international market. With a solid structure to meet the highest demands required by the international market.

Impacts:

Access to markets, fair and competitive prices.

A real value chain, where the most important aspect is the human being and caring for the environment and the consumer.

Access to timely and effective services for small producers, which are channeled through the cooperatives.

A business model that enables access to cooperation and development projects for cooperative communities.

Values and Engagements

Human well-being as a priority: We act for human well-being.

The Earth and nature as a gift: We protect and improve the environment and biodiversity.

The customer as a partner: We offer satisfaction to build very long-term business relationships.

Integrity, fairness, and independence as guiding principles: We always strive to do the right thing, independently.

High-quality products and services.

Act for better living conditions.

To build a bridge between producers and consumers.

Sustainable Forestry Development

FEDECOVERA's sustainable forestry development project began in 1996 with the installation of a high technology forestry nursery, which meant the beginning of the diversification process.

Our forestry industry combines the responsible use of forest resources with processing methods that add value to the wood and create opportunities for our cooperatives and producers.

The wood we process comes from forests managed responsibly and from our cooperatives' plantations.

Since 1996, FEDECOVERA has strengthened its

forest nursery

as a strategic foundation for the supply chain, with the capacity to produce more than 4 million plants per year of various forest and agroforestry species, equivalent to the planting of approximately 4,000 hectares annually. This production supplies our cooperatives and contributes to the development of sustainable systems, productive restoration, and reforestation in the region.

Our Services

Customized Carving and Engraving

We utilize state of the art CNC router technology to create personalized engravings and carvings.

Our precision tools allow us to bring intricate details to life, transforming simple wood into exquisite moldings, awards, and reliefs. Elevate your projects with our custom craftsmanship, designed to meet your exact specifications and add a unique touch to every piece.

Customized Carving and Engraving

Our state-of-the-art facilities are designed to offer comprehensive solutions for processing high-quality sawn wood, both large and small diameters, using high-speed sawmills for rapid and accurate processing. We enhance its quality and durability with our specialized drying service, ensuring optimal results, backed by ISPM-15 (International Standard for Phytosanitary Measures) certification for thermal treatment, delivering precision and excellence with each piece, tailored to meet the highest standards and the specific needs of our clients.

Carpentry

Moldings

Our Comercial Pine Moldings are manufactured from carefully selected pine timber, offering quality, versatility, and aesthetic appeal for residential, commercial, and industrial applications.

Designed to meet industry standards, these moldings offer consistent quality, durability, and ease of installation. Their versatility makes them suitable for a wide range of finishing and decorative applications, while maintaining an attractive natural wood appearance.

Moldings Specification Chart

Material	Item	Measures
Pine	Pingeon Breast Molding	3/4"X2"X8'
Pine	Colonial Fluted Molding	3/4"X3"X8'
Pine	Decorative Molding	3/4"X3"X8'
Pine	Decorative Cornice	3/4"X3"X8'
Pine	Ornamental Cornice	3/4"X3"X8'
Pine	Slatted Panel	3/4"x4"x8'
Pine	Ornamental Curved Molding	3/4"X5X8'
Pine	Ornamental Curved Cornice	3/4"X5X8'
Pine	Triangular Angle Molding	3/4"X3"X8'
Pine	Baseboard	3/4"X5X8'
Pine	Grooved Baseboard	3/4"x4"x8'
Pine	Chair Rail Molding	1/2"X1 1/4"X8'
Pine	Quarter Round Molding	3/4"3/4"8'
Pine	Decorative Angle Cornice	1"X2"X8'
Pine	Ornamental Cornice	1"X2"X8'
Pine	Ornamental Cornice	1"X3"X8'

Boards

We offer wooden boards manufactured from carefully selected Pine and Teak timber, available in a wide range of dimensions and specifications to meet the needs of furniture manufacturers, construction projects, interior design, and woodworking industries.

Our boards are produced under strict quality standards, ensuring durability, stability, and an excellent finish and kiln dried wood. Pine provides a versatile and cost-effective solution, while Teak is recognized worldwide for its exceptional strength, natural beauty, and resistance to moisture and weather conditions.

Boards Specification Chart

Item	Measures	Material
Edge-Glued board	A/B 2" x 4' x 8'	PINE / TEAK
Finger Joint board	A/B 3/4" x 4' x 8'	PINE / TEAK
Finger Joint board	A/B 5/8" x 4' x 8'	PINE / TEAK
Edge-Glued board	A/B 3/4" x 4' x 6'	PINE / TEAK
Edge-Glued board	A/B 5/8" x 4' x 6'	PINE / TEAK
Edge-Glued board	A/B 5/8" x 2' x 5'	PINE / TEAK
Edge-Glued board	A/B 3/4" x 2' x 5'	PINE / TEAK

Sawn Lumber Processing

We process wood from responsible sources into products that meet a variety of commercial, construction, and industrial needs, making efficient use of the resource and adding value locally.

Our product line includes items manufactured according to criteria of quality, functionality, and responsible use of wood.

These include pallets, joists, plywood, and other solutions developed for our customers' diverse uses and requirements.

Furniture

We create wooden furniture that combines quality, functionality, and timeless design, highlighting the skilled craftsmanship and identity of our forestry industry.

We design pieces for homes, offices, commercial spaces, and institutional projects, striving to ensure that each product preserves the essence and natural characteristics of the wood while meeting the needs of each client.

Discover a unique concept where design, durability, and environmental consciousness come together to offer you timeless pieces with a single purpose: to transform spaces with elegance, ecological responsibility, and a cooperative spirit.

We Create:

- Living Rooms
- Bedrooms
- Dining Rooms
- Offices and Executive Spaces
- Outdoor Furniture
- Home Decor
- Accessories
- Customization Options and Finishes
- Contact and Location

Sherwin Williams Varnish Colors Available

We offer water-based finishes, ideal for both indoor and outdoor applications, providing a durable, eco-friendly, and safe finish.

For furniture exposed to demanding weather conditions, we offer polyurethane, polyester, and marine-grade finishes. These specialized options provide high resistance to moisture and the elements, ensuring enhanced protection and long-lasting durability.
